

SWARAN SINGH

FULL-STACK DEVELOPER | BACKEND ENGINEER

Patiala, Punjab, India • +91 79864 54210 • deepnirmaan8@gmail.com • linkedin.com/in/swaran-singh-264635145/

PROFESSIONAL SUMMARY

Full-Stack Developer with 5+ years of software development experience, with a strong backend focus and hands-on ownership of enterprise applications, business logic, APIs, databases, integrations and increasingly complex frontend work. Experienced across Node.js, TypeScript, TypeORM, PostgreSQL, MariaDB/MySQL, Angular, React.js, PHP and Laravel. Strong in business workflows, calculation-heavy systems, CRUD modules, authentication, reporting, payments, real-time communication, file handling, third-party APIs and cloud storage. Currently working on a large transport-logistics platform spanning dispatch, loads, safety, maintenance, accounting, driver trips, settlements, tracking, reefer reporting, dashboards and operational alerts.

CORE STRENGTHS

Backend Engineering	Node.js · TypeScript · PHP/Core PHP · Laravel · REST APIs · business logic · CRUD
Databases	PostgreSQL · MariaDB/MySQL · MongoDB · TypeORM · raw SQL · transactions · reporting
Frontend	Angular + TypeScript · React.js · JavaScript · jQuery · HTML/CSS · Bootstrap
Enterprise Systems	Logistics · fleet operations · tax/accounting · settlements · client workflows
Security & Auth	JWT · AWS Cognito · custom roles/permissions · custom validation · Laravel Sanctum
Cloud & Integrations	AWS SDK/S3 · Google APIs · Samsara · Orbcomm · Stripe · CCAvenue

PROFESSIONAL EXPERIENCE

Software Developer — Full-Stack / Backend Focus

OCT 2024 — PRESENT

Bawatech · Patiala

Advanced Transport Logistics Platform — current and most advanced enterprise project; currently serving a single owner/client with planned evolution toward a paid multi-client service model.

- Develop backend services and APIs using Node.js, TypeScript, TypeORM and PostgreSQL, including complex business rules, relational workflows and reporting logic.
- Work across Dispatch, Loads, Safety, Maintenance, Accounting, Driver Trips, Settlements, Advance Pay, Driver/Truck Continuity, Reporting, Masters and Settings.
- Implement dashboards with statistics, tasks, alerts and reminders, plus truck/driver tracking and reefer reporting.
- Integrate vehicle/device APIs including Samsara and Orbcomm, and Google location search/autocomplete and Distance Matrix.
- Implement employee authentication with AWS Cognito and file storage using AWS SDK + Amazon S3; use Nodemailer and Socket.IO for communication workflows.
- Contribute to the Angular + TypeScript frontend by creating screens and integrating APIs developed on the backend.
- Use TypeORM and raw PostgreSQL SQL for complex reporting and performance-sensitive data operations.

Technology: Node.js · TypeScript · TypeORM · PostgreSQL · Angular · AWS Cognito · S3 · Samsara · Orbcomm · Google APIs · Socket.IO · Nodemailer

Software Developer — Backend / Full-Stack

DEC 2022 — SEP 2024

Bawatech · Patiala

Tax, Accounting & Client Applications

- Primary backend developer for calculation-heavy tax and accounting workflows.
- Built Node.js APIs and business rules for linked, data-dependent forms and financial calculations.
- Connected backend functionality with React.js screens and worked with MariaDB/MySQL.

Technology: Node.js · TypeScript · TypeORM · React.js · MariaDB/MySQL

Tax Filing Client Portal — Side Project

- Built APIs/workflows for signup, login, forgot-password, authentication, employee management and document handling.
- Implemented tax-document uploads with expiry handling and employee/admin workflows.
- Integrated Stripe payments, Socket.IO real-time user/employee chat with database persistence, and Nodemailer email communication.
- Developed and integrated required React.js APIs while backend/API work was handled independently from UI design.

Technology: Node.js · TypeScript · TypeORM · React.js · MariaDB/MySQL · Stripe · Socket.IO · Nodemailer · Multer · JWT

Fashion & Bridal E-commerce Platform

- Developed admin product/image/order management and customer-facing shopping workflows.
- Implemented signup/login, product browsing, wishlist, cart, order placement and payment functionality in React.js.
- Integrated CCAvenue and admin visibility into orders and payment activity.

Technology: Core PHP · Custom PHP Framework · MariaDB · React.js · CCAvenue

Product Catalog Management Platform

- Built Node.js + TypeScript backend and React.js frontend for product management.
- Implemented categories, colors, types, attributes and image management.
- Implemented Multer uploads with structured year/month/date-based file storage.

Technology: Node.js · TypeScript · MariaDB · React.js · Multer

Android API Support & PHP Utility Projects

- Fixed and implemented APIs for an Android application built with Expo.
- Worked on smaller PHP utilities including invoice-generation functionality.

Technology: Expo · Android · PHP · REST APIs

Software Developer

OCT 2021 — NOV 2022

Sigea Solutions · Patiala

Enterprise Transport Logistics Platform

- Developed backend APIs and CRUD for Dispatch, Maintenance, Masters, Reporting, Customers, Locations, Accounting, Settlements, Settings and Authentication.
- Implemented custom role/permission systems and custom validation utilities without dedicated libraries.
- Integrated truck/trailer device APIs for locations, temperatures and vehicle readings, including Samsara/Orbcomm-type integrations.
- Integrated Google autocomplete/location search and Distance Matrix APIs.
- Implemented PHP/cPanel file uploads and email workflows; worked with Core PHP, custom PHP framework, jQuery, JavaScript, HTML/CSS, Bootstrap, MariaDB and raw MySQL queries with and without transactions.

Clerk

MAR 2018 — NOV 2019

Rayat Bahra Group of Institutes · Patiala

Professional experience outside software development that strengthened organizational and workplace skills.

Android Training

2017

Sachtech Solution · Mohali

Completed Android training during MCA, establishing an early foundation in application development.

TECHNICAL SKILLS — DETAILED

Languages	TypeScript · JavaScript · PHP · SQL · HTML · CSS
Backend	Node.js · Core PHP · Custom PHP Framework · Laravel · REST APIs · business logic · CRUD · validation
Data Access	TypeORM · raw SQL · PostgreSQL · MariaDB/MySQL · MongoDB · transactions · reporting
Frontend	Angular · Angular + TypeScript · React.js · jQuery · Bootstrap · responsive UI · API integration
Authentication	JWT · AWS Cognito · custom RBAC · custom validation · Laravel Sanctum
Cloud / Storage	AWS SDK · Amazon S3 · AWS Cognito · file upload/storage workflows
Payments	Stripe · CCAvenue
Realtime / Email	Socket.IO · sockets · Nodemailer
External APIs	Google Places/Autocomplete · Google Distance Matrix · Samsara · Orbcomm
Files / Documents	Multer · structured file storage · document expiry · invoice/PDF workflows
Mobile	React Native CLI · Expo · Android · API integration · application state/store
Tools	Git · GitHub · GitLab · VS Code · XAMPP · pgAdmin 4 · HeidiSQL

SELECTED PROJECTS

01	Advanced Transport Logistics Platform CURRENT · ENTERPRISE Large logistics platform covering dispatch, loads, safety, maintenance, driver trips, settlements, advance pay, accounting, tracking, reefer reporting, dashboards, tasks, alerts, reminders and integrations. Technology: Node.js · TypeScript · TypeORM · PostgreSQL · Angular · AWS Cognito · S3 · Samsara · Orbcomm · Google APIs
02	Tax & Accounting Software ENTERPRISE Calculation-heavy business application with interconnected forms, backend business rules, APIs and financial processing. Technology: Node.js · TypeScript · React.js · MariaDB · TypeORM
03	Tax Filing Client Portal SAAS / FULL-STACK Client/employee portal with document uploads, expiry handling, payments, authentication, email and real-time chat. Technology: Node.js · TypeScript · TypeORM · React.js · MariaDB · Stripe · Socket.IO · Nodemailer
04	Fashion & Bridal E-commerce Platform E-COMMERCE Product, image, cart, wishlist, ordering and payment workflows with admin and customer experiences. Technology: Core PHP · Custom PHP Framework · MariaDB · React.js · CCAvenue
05	Product Catalog Management Platform FULL-STACK Product administration with categories, colors, types, images and structured date-based storage. Technology: Node.js · TypeScript · MariaDB · React.js · Multer
06	Transport Logistics Management System EARLIER · ENTERPRISE Earlier logistics platform covering dispatch, maintenance, work orders, reporting, fleet operations and third-party integrations. Technology: Core PHP · Custom PHP Framework · MariaDB · jQuery · JavaScript · Google APIs · JWT
07	React Dashboard & Component Demo PERSONAL Frontend architecture experiment with reusable components, store/state, Axios, APIs and sockets. Technology: React.js · Store · Axios · APIs · Sockets
08	React Native Demo Apps PERSONAL · MOBILE Mobile experiments including gallery functionality, reusable UI and API integration. Technology: React Native · Expo · Android
09	Laravel 12 API Template PERSONAL · BACKEND REST API demo exploring signup/login, Sanctum authentication and roles/permissions. Technology: Laravel 12 · Sanctum · REST API
10	ESP32 & Electronics Experiments PERSONAL · IOT Hands-on experiments with ESP32, OLED, SD storage, sensors, power systems and custom interfaces. Technology: ESP32 · Arduino · OLED · IoT

EDUCATION

Master of Computer Applications (MCA)

2014 — 2017

ASRA Group of Institutes, Rajpura

Bachelor of Computer Applications (BCA)

2011 — 2014

ASRA Group of Institutes, Rajpura

Senior Secondary — Non-Medical

2009 — 2010

Akal Academy, Chhanna

Matriculation

2007 — 2008

Akal Academy, Chhanna

INDEPENDENT LEARNING & PERSONAL WORK

- Build browser-based tools and information websites including MyToolsHut and AIToolsMagic.
- Explore local AI models from Hugging Face and Ollama, experiment with llama.cpp, and build local workflows with n8n.
- Explore AI-assisted development, automation, IoT and developer tooling through practical working prototypes.
- Hands-on electronics work with ESP32, OLED, SD cards, sensors, batteries and custom interfaces.

PROFESSIONAL VALUE

- Backend ownership: translate complex business requirements into APIs, data models, validation and reliable workflows.
- Full-stack capability: work across backend services and Angular/React screens and API integrations.
- Business-domain depth: logistics, fleet operations, tax/accounting, payments, documents and client-service systems.
- Integration mindset: payment gateways, Google services, vehicle/device platforms, authentication, email and cloud storage.
- Problem-solving: understand complete systems, debug real workflows and build practical solutions.
